## ABOUT ME

Final-year Computer Science (AI/ML) student who can Design, Develop & Deploy across the stack — from AI/LLM workflows to production-ready full-stack applications. Two-time hackathon winner with hands-on experience building RAG pipelines, real-time platforms, and developer tools.

## EDUCATION

### School of Management Sciences, Lucknow (AKTU)

Aug 2023 – May 2027

*B.Tech. – Computer Science & Engineering (AI/ML Specialisation), CGPA: 7.84/10*

*Lucknow, India*

- Relevant Coursework: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Artificial Intelligence
- Smart India Hackathon (SIH) Team Lead: directed problem-statement research and task allocation for a national-level government-sponsored hackathon.

## EXPERIENCE

### Amigo India

Jun 2026 – Present

*Machine Learning & Generative AI Intern*

*Remote*

- Learned and applied LangChain and LangGraph fundamentals by building a Retrieval-Augmented Generation (RAG) pipeline with Pinecone vector search for an internal AI workflow prototype, under mentorship from senior ML engineers.
- Applied prompt engineering techniques across iterative LLM workflow experiments in Google Colab to improve output reliability and cut experimentation time.

### RevLabz Solutions

Nov 2025 – Jan 2026

*Software Development Intern*

*Remote*

- Developed and shipped 5+ production feature modules and a Chrome browser extension for the Ingenium platform using React.js and TypeScript.
- Integrated RESTful APIs for real-time data synchronization, reducing manual data entry by 40% and improving data consistency across a cross-functional team of 5 engineers.

## PROJECTS

### RescueNet | React.js, TypeScript, Express.js, PostgreSQL, MapLibre GL

2025

- Built a real-time emergency response platform visualizing live disaster telemetry from USGS, GDACS, and NASA FIRMS on an interactive HUD-style map interface.
- Developed a secure Express.js backend with JWT authentication and PostgreSQL; won 1st Prize at the Amigo India Hackathon among teams from multiple colleges. Recognized in local press coverage following the win.

### TrustLab | React.js, Node.js, Express.js, MongoDB, TypeScript

Apr 2026

- Architected a full-stack lab management platform with JWT authentication, RBAC, and real-time CRUD operations managing 50+ resources across multiple user roles.
- Designed 10+ RESTful API endpoints using Express.js and MongoDB; won 1st Prize at the KMCLU Hackathon against 20+ teams in a 24-hour sprint.

### Node Studio | React.js, TypeScript, React Flow, FastAPI, Python

Jul 2026

- Built an n8n-style drag-and-drop visual pipeline editor with a fully typed React/TypeScript frontend and 5+ custom workflow node types.
- Implemented a FastAPI backend to validate Directed Acyclic Graphs (DAGs) using Kahn's Algorithm, with real-time node/edge validation and JSON pipeline import/export.

## TECHNICAL SKILLS

**Languages:** JavaScript, TypeScript, Python, C++, SQL, Solidity, Rust

**Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS, RainbowKit

**Backend:** Node.js, Express.js, FastAPI, REST APIs, WebSocket, JWT, RBAC

**AI/ML:** LangChain, LangGraph, Retrieval-Augmented Generation (RAG), Pinecone, Prompt Engineering

**Web3:** Solana, Smart Contracts, On-chain Attestation, IPFS, Jupiter Aggregator

**Databases:** MongoDB, PostgreSQL, Supabase

**DevOps:** Docker, CI/CD Pipelines, GitHub Actions, Linux, Vercel, Render

**Tools:** Git, GitHub, Postman

## ACHIEVEMENTS

- Two-time hackathon winner (1st Place, 20+ competing teams each) — Amigo India Hackathon (RescueNet) and KMCLU Hackathon (TrustLab).
