About Me

Fourth-year CS undergraduate (AI/ML) who designs, builds, and ships across the stack — AI/LLM workflows, full-stack apps, and Web3 systems. Three-time hackathon winner and Stellar India Blockchain Ambassador with hands-on experience in RAG pipelines, on-chain smart contracts, trading infrastructure, and real-time developer tools.

Education

School of Management Sciences, Lucknow (AKTU)

Aug 2023 – May 2027

B.Tech. — Computer Science & Engineering (AI/ML Specialisation), CGPA: 7.84/10

Lucknow, India

- Relevant coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Artificial Intelligence.
- Two-time Smart India Hackathon (SIH) participant (one edition as Team Lead); regular participant in internal college hackathons.

Experience

Amigo India

Jun 2026 – Present

Machine Learning & Generative AI Intern

Remote

- Learned and applied LangChain and LangGraph fundamentals by building a Retrieval-Augmented Generation (RAG) pipeline with Pinecone vector search for an internal AI workflow prototype, under mentorship from senior ML engineers.
- Applied prompt engineering techniques across iterative LLM workflow experiments in Google Colab to improve output reliability and cut experimentation time.

RevLabz Solutions

Nov 2025 – Jan 2026

Software Development Intern

Remote

- Developed and shipped 5+ production feature modules and a Chrome browser extension for the Ingenium platform using React.js and TypeScript.
- Integrated RESTful APIs for real-time data synchronization, reducing manual data entry by 40% and improving data consistency across a cross-functional team of 5 engineers.

Leadership & Community

Technical Head

2025 – Present

Abhivyakti Club

SMS Lucknow

- Lead technical operations for club and institution-wide events, coordinating hackathons, workshops, and technical drives.
- **Blockchain Ambassador, Stellar India** — drive developer awareness and onboarding within the campus builder community. **Member, Lucknow DAO**; selected participant, **Solana Fall Cohort**.

Achievements

- **1st Prize, Amigo India Hackathon** — won among teams from multiple colleges; project recognized in local press coverage.
- **1st Prize, KMCLU Hackathon** — won against 20+ teams in a 24-hour sprint.
- Launched the **RepHood** token on virtuals.io, reaching \$66K in trading volume.

Projects

LuminaDeFi — Solana, Anchor, Rust, TypeScript

2026

- Built a prediction market DEX on Solana (Anchor) with a constant-product AMM for YES/NO shares and a second AMM pool for trading probability volatility directly.

SprintFlow — React.js, TypeScript, Vite, Express.js

2026

- Built a production-grade, full-stack Kanban board application with a React + TypeScript (Vite) frontend and an Express + TypeScript backend for board, column, and card management.

RepHood — Solidity, Arbitrum Orbit L3, IPFS, Node.js

Jul 2026

- Built an AI-agent reputation engine on Robinhood Chain (Arbitrum Orbit L3) with a custom Reputation Delta formula, IPFS-anchored proofs, and on-chain Solidity attestation; launched token on virtuals.io, reaching \$66K in trading volume.

Node Studio — React.js, TypeScript, React Flow, FastAPI, Python

Jul 2026

- Built an n8n-style drag-and-drop visual pipeline editor with 5+ custom node types and a FastAPI backend validating DAGs via Kahn's Algorithm.

Technical Skills

- **Languages:** JavaScript, TypeScript, Python, C++, SQL, Solidity, Rust
- **Full-Stack & Frameworks:** React.js, Next.js, Node.js, Express.js, FastAPI, Tailwind CSS, REST APIs, JWT/RBAC
- **AI/ML & Web3:** LangChain, LangGraph, RAG, Pinecone, Solana, Anchor, Smart Contracts, IPFS
- **Databases & DevOps:** MongoDB, PostgreSQL, Supabase, Docker, CI/CD, GitHub Actions, Vercel, Git
